

ALEKSANDR SHUSTERMAN

Senior AI Implementation Project Manager

PMP | PMI-CPMAI | CSM

Greater New York Area | ashusterman1988@gmail.com | linkedin.com/in/aleksandrshusterman

Portfolio: ashusterman1988.github.io

PROFESSIONAL SUMMARY

Implementation project manager with 10+ years taking enterprise customers from discovery to go-live, now running 3 to 4 programs at a time at Maersk, including an executive-sponsored automation reset for a global consumer brand with a value case of 1,800 hours a month. Holds the PMI Certified Professional in Managing AI (PMI-CPMAI) and runs AI projects the way it teaches: a clear go/no-go, data readiness before build, measured pilots, and monitoring after launch. Non-technical by background, and the person who keeps business, data, and engineering teams aligned from kickoff to adoption.

16 implementations closed • 97% CSAT • 1,800 hrs/month value case • 10 hrs/week saved with AI

CORE SKILLS

AI Delivery (PMI-CPMAI): AI implementation & adoption, AI Go/No-Go, use-case scoping, generative AI use cases, success criteria & ROI, data readiness & governance, pilot & evaluation planning (A/B, shadow mode), drift monitoring, Responsible & Trustworthy AI

Implementation & Program Management: End-to-end SaaS implementations, customer onboarding, stakeholder management, cross-functional leadership, executive steering, RAID & risk management, scope, budget & change control, change management & training, API & EDI integration coordination, UAT & go-live readiness, hypercare, Waterfall, Agile & Scrum

Industries: Supply chain & logistics (ocean, parcel, 4PL), healthcare (Medicaid, Medicare, MCO), enterprise SaaS

Tools: ChatGPT, Microsoft Copilot, Claude, Azure AI, Asana, Jira, Confluence, Smartsheet, MS Project, Salesforce, Power BI, SharePoint, Microsoft 365

CERTIFICATIONS

PMI Certified Professional in Managing AI (PMI-CPMAI) | Certified ScrumMaster (CSM®)

Project Management Professional (PMP®) | Microsoft Azure AI Fundamentals (AI-900)

EXPERIENCE

Customer Implementation Manager

July 2024 – Present

A.P. Moller – Maersk | New Jersey

- Leading an executive-sponsored automation reset for a global consumer brand across 5 origins and 13 destination regions, turning hackathon ideas into a phased operating model with a value case of 1,800 hours a month in freed capacity (about 10 to 11 FTE), and using AI to translate training materials for each region.
- Manage 3 to 4 concurrent enterprise implementations across ocean, air, e-commerce, ground freight, and end-to-end supply chain, owning customer onboarding through go-live and hypercare for accounts worth up to \$5M in annual revenue.
- Closed 16 implementations since July 2024 with 97% customer satisfaction, 95% on time for standard projects and 90% for complex ones, with every timeline change documented and signed off by stakeholders.
- North America lead on a global ocean freight control-tower implementation for a multinational elevator manufacturer (about 7,500 FCL a year across four regions), driving rate table and billing setup, customs and ISF testing, onboarding of two NVOCC carriers, and integration with a third-party freight audit and payment provider, going live on schedule.
- Launched a domestic e-commerce parcel operation across five sort facilities at once, then resolved manifest, tracking, and billing issues spanning three systems through first invoice and a clean closeout.
- Built Claude agents in Cowork, connected to a knowledge base of past SOPs, project plans, and customer documents (RAG), that draft SOPs, kickoff decks, and executive presentations for every new implementation, cutting each from 1 to 2 days of work to 1 to 3 hours and saving about 10 hours a week.

- Project manager for an API booking integration between Maersk and a major US retailer's new supplier booking platform, running requirements, API spec and data-mapping workshops, and integration testing and UAT planning toward a January 2027 pilot.
- Caught an API integration gap tied to a customer's billing requirement before go-live and resolved it ahead of schedule using a buffer built into the critical path.
- Run weekly steering committees with customer C-suite and Maersk leadership, keeping updates short and direct on status, risks, and decisions, and delivering on what was committed in the room.

Senior Implementation & Operations Manager

November 2017 – March 2024

Medical Transportation Management (MTM) | Weehawken, NJ

- Regional implementation lead for the company-wide rollout of Reveal, a CRM and operations platform for 600+ users across operations, finance, and customer experience; region went live on time and on scope.
- Led 6 multi-million-dollar MCO and state Medicaid/Medicare contract launches over 5 years, each live in 3 to 6 months and fully SLA-compliant.
- Built and led a team of 9 vendor account managers covering 300+ transportation vendors across 13 contracts, improving on-time performance 26% in North Carolina, the company's hardest market, and running the top-rated regional team in the company.
- Owned the regional budget and financials for contact center and logistics operations generating \$30M over tenure, and presented results to the C-suite at quarterly business reviews.
- Co-managed customer experience and analytics for New York City's accessible taxi dispatch program with the Taxi and Limousine Commission, building passenger surveys, SOPs, and data-driven performance reporting.
- Cut regional turnover from 13% to 3% in the first year, the best in the company, saving \$85K a year in attrition costs.
- Started as Call Center Manager, cutting average trip cost 18% in four months and promoting two agents to supervisor, before moving into senior operations and implementation leadership.

ADDITIONAL EXPERIENCE

AI Project Control Room | Interactive PMI-CPMAI Demo

2026

ashusterman1988.github.io/ai-project-control-room

- Built an interactive 3D walkthrough of the PMI-CPMAI method: three AI projects taken through six go/no-go gates, plus a decision simulator that prices wrong calls in weeks and dollars.

Independent PM Consultant (part-time)

October 2021 – June 2024

Law Office of Eli Shmulik | New York, NY

- Led the SmartAdvocate CRM rollout at a new firm with no systems in place, one workstream at a time, covering user access, training, and an in-house expert so the team could run it on their own.
- Mapped the full case lifecycle from intake to trial and built KPIs from scratch to find and fix the bottlenecks slowing cases down.

Assistant Manager

June 2013 – October 2017

Independence Care System | Brooklyn, NY

- Ran daily operations for a 15-person member services team at a Medicaid managed care organization, keeping the team on SLA and contract requirements.

EDUCATION

Master of Public Administration (MPA), Health Care Management

2017

Long Island University | Pi Alpha Alpha Honor Society

Bachelor of Arts (BA), Psychology

2011

CUNY Baruch College | Founder and President, Psi Chi Honor Society Chapter

Languages: English (native), Russian (fluent)
